EDUCATION

Vellore Institute of Technology — **Chennai, Tamil Nadu**

Bachelor of Technology in Computer Science (Data Science Specialisation) — *Graduation: May 2027*

SKILL SUMMARY

Analytics & Data: Python, SQL, Pandas, NumPy, Data Analysis, Exploratory Data Analysis, Statistical Analysis, Data Cleaning, Feature Engineering, Data Processing
Business Intelligence: Power BI, DAX, Excel, Data Visualization, Dashboard Development, KPI Analysis, Business Analytics
Machine Learning: Scikit-learn, XGBoost, Classification, Forecasting, Anomaly Detection, Predictive Modelling, Model Evaluation, Explainable AI, NLP, OCR
Databases & Data Engineering: MySQL, SQLite, Relational Databases, Data Warehousing, ETL, Data Pipelines, Structured & Unstructured Data Processing
Programming & Tools: FastAPI, Flask, REST APIs, Git, GitHub, Docker, Jupyter

EXPERIENCE

VOIS – Vodafone Idea Foundation* |LINK** — ***Aug – Sep, 2025

- Analysed 2 real-world business datasets containing 8,500+ records, applying data preprocessing and AI-assisted analytics to identify trends and generate 15 actionable business insights for data-driven decision-making.
- Validated analytical findings for accuracy and consistency, reviewing outputs to ensure reliable and meaningful insights for business recommendations.
- Established a standardised analytics workflow covering data preprocessing, insight generation, and validation, enabling consistent conversion of raw business data into actionable recommendations.

PROJECTS

***Financial Transaction Anomaly Detection & Audit Dashboard* | LINK**

- Engineered an end-to-end financial analytics pipeline processing 50K+ PaySim transactions, combining statistical outlier analysis, duplicate detection, vendor-velocity checks, HHI concentration analysis, and Isolation Forest to identify transaction risk.
- Designed a star-schema data warehouse in SQLite and developed a composite 0–100 risk score, surfacing 357 high/critical-risk transactions with end-to-end analysis completed in under 7 seconds.
- Built a 5-page Power BI audit dashboard with 20+ DAX measures to translate transaction-level analysis into vendor risk, anomaly-rate, and trend insights, with automated tests for pipeline reliability.

***Customer Lifetime Value Prediction & Segmentation* |LINK**

- Analysed 1M+ retail transactions to uncover purchasing patterns, quantify customer value, and identify churn and revenue opportunities through customer-level behavioural analysis.
- Developed BG/NBD and Gamma-Gamma predictive models, achieving 0.87 R^2 for 12-month customer value prediction and translating transaction behaviour into actionable customer segments.
- Built interactive Power BI dashboards and an ROI simulator to connect customer segments and revenue forecasts with retention opportunities and business decision-making.

***Real-Time Stock Market Anomaly Detector* |LINK**

- Engineered a real-time analytics pipeline processing 2M+ NSE market records, combining price signals and financial-news sentiment to identify unusual market behaviour.
- Developed and evaluated Isolation Forest and LSTM Autoencoder models, achieving 88% precision and 85% recall on validation data for market anomaly detection.
- Optimised the analytics pipeline to reduce detection latency by 35%, enabling near real-time monitoring of unusual market events and faster analytical response.

***Docwise* |LINK**

- Engineered an end-to-end RAG-based document analytics pipeline using Google Gemini, NLP, TF-IDF retrieval, and intelligent chunking, achieving 95%+ query accuracy on PDFs exceeding 200 pages.
- Developed the complete data-processing workflow from document extraction and chunking to retrieval, contextual ranking, and LLM-based response generation.
- Improved analytical response reliability through retrieval tuning, prompt engineering, and hallucination-aware validation, increasing contextual relevance and answer consistency.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional |**LINK** 2026
- Deloitte Australia Data Analytics Job Simulation |**LINK** 2025
