EDUCATION

Vellore Institute of Technology — **Chennai, Tamil Nadu**

Bachelor of Technology in Computer Science (Data Science Specialisation) — *Graduation: May 2027*

SKILL SUMMARY

Languages: Python, SQL, Java, C/C++, R
Machine Learning & Data Science: Scikit-learn, Pandas, NumPy, Feature Engineering, Exploratory Data Analysis, Statistical Analysis, Model Evaluation, Anomaly Detection, Time-Series Analysis
Deep Learning & Computer Vision: PyTorch, CNNs, EfficientNet, ViT, LSTM, Computer Vision, Image Processing
Data Analytics & Visualization: Power BI, DAX, Tableau, Matplotlib, Plotly
Generative AI & NLP: LLMs, RAG, Prompt Engineering, Google Gemini API, Document Q&A
Backend & Application Development: FastAPI, Flask, REST APIs, React.js, Streamlit
Databases & Data Engineering: SQL, SQLite, MySQL, MongoDB, Redis, Data Pipelines, Data Warehousing
Cloud & Engineering: AWS, Docker, Git/GitHub, PyTest, Jupyter Notebook, Reproducible Experimentation

EXPERIENCE

VOIS – Vodafone Idea Foundation* |LINK** — ***Aug – Sep, 2025

- Analysed 2 real-world business datasets containing 8,500+ records, applying data preprocessing and AI-assisted analytics to identify trends and generate 15 actionable business insights for data-driven decision-making.
- Validated analytical findings for accuracy and consistency, reviewing outputs to ensure reliable and meaningful insights for business recommendations.
- Established a standardised analytics workflow covering data preprocessing, insight generation, and validation, enabling consistent conversion of raw business data into actionable recommendations.

PROJECTS

***Brain Tumor Classification Using Hybrid Deep Learning* |LINK**

- Developed a hybrid EfficientNet + Vision Transformer (ViT) model for brain tumor image classification, achieving ~94% test accuracy and 0.92 F1-score across 4 tumor classes.
- Preprocessed and analyzed 3,000+ medical images using image normalization, resizing, augmentation, EDA, and visualization to improve dataset quality and model generalization.
- Built a reproducible Jupyter-based deep learning pipeline covering preprocessing, model training, validation, and evaluation, reducing experimentation time by ~30% through automated training and evaluation workflows.

***Financial Transaction Anomaly Detection & Audit Dashboard* | LINK**

- Engineered an end-to-end Python analytics pipeline processing 50K+ PaySim transactions, incorporating data validation, duplicate detection, statistical outlier analysis, vendor-velocity checks, HHI concentration analysis, and Isolation Forest.
- Designed a star-schema SQLite data warehouse and implemented a composite 0–100 risk-scoring framework, identifying 357 high/critical-risk transactions with end-to-end analysis completed in under 7 seconds.
- Developed a 5-page Power BI dashboard with 20+ DAX measures to deliver vendor risk, anomaly-rate, and transaction trend insights, supported by automated pipeline tests.

***AI-Powered Expense Receipt Scanner & Analytics Platform* |LINK**

- Built a full-stack receipt processing platform that extracted structured data from 12,000+ receipts with approximately 96% OCR accuracy using EasyOCR and OpenCV.
- Developed secure FastAPI backend services with JWT authentication, Google OAuth, and REST APIs, reducing average API response time to under 180 ms.
- Automated expense categorisation and analytics through NLP-based processing, reducing manual bookkeeping effort by 80% while providing interactive financial dashboards.

***Real-Time Stock Market Anomaly Detector* |LINK**

- Engineered a real-time market analytics pipeline processing 2M+ NSE records, combining price signals and financial-news sentiment to detect unusual market behaviour.
- Developed and evaluated Isolation Forest and LSTM Autoencoder models, achieving 88% precision and 85% recall on validation data for anomaly detection.
- Optimised the analytics pipeline to reduce detection latency by 35%, enabling near real-time monitoring and faster identification of unusual market events.

Certifications

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional |**LINK** — 2026
- Deloitte Australia Data Analytics Job Simulation |**LINK** — 2025
